The Quaker Bridge Road.

Dr. Chas. Duffy, Sr., called to see us vesterday and we had a pleasant conversation concerning the Quaker Bridge Road. The Doctor will soon be seventy-six years old: has spent fifty years of his life in Onslow county, and bids fair to be among the living there for several vears yet. He was among the first to drive a buggy over the new road and we desire to give to the public his opinion of it:

"What do you think of the road Doctor?

"Well sir, the Ohslow side is fine road, but the Jones county side is a scandalous piece of work. Capt. McIver has made a nice job of his end of the road, and if the Jones county end was finished up as it ought to be it would be the finest road in the State.

"Who is Mr. Hervey?" asked I never should have taken it for of the States. He referred to the THE INFLUENCE OF THE TARIFF ON will visit New Berne any more after ing, the formation of agricultural this road is completed than they do societies, the infusion of a larger

"Oh yes, The road will be a great benefit to the laboring class of people; the people who constitute the substantial class of our population. ing, instead of having everything ra, feigning a cheerfulness that she Mr. Reed smiled, as he stroked men were tried, many of them found duties on many articles, the manuhas ever been given to the people of turns. iquors can be saved by divers.

The steamer Conoho was run down by the propeller Fairchilds in Currituck Sound on Saturday night and sunk. The Conoho was coming to Baltimore, whilst the Fairchilds was on her way with a cargo of general merchandise to landings on the Roanoke river.

Gov. Vance in his Mooresville speech said old, York, as he called himself, was going over the country grown considerably since that time. trying to talk about the tariff and he don't know any more about the tariff than a pinerooting hog did the liver and biliary apparatus, and

campaign, only 40 cents.

FIELD AND FARM.

Beautifying Farms.

Great progress has been made by farmers within the last year not only in making their farms more productive, but in making them more attractive. This in a large measure is the result of prosperous farming. Those who had debts to pay, did not feel able to spend much in ornamenting their places; but since they have freed them selves from this burden, they ha been more disposed to attend to the appearance of things.

There has been also an advance in taste. There are not so many now, as formerly, who decry all attention to the ornamental as a waste of time and money. This race of niggardly and boorish men is fast dying out. Increasing intelligence, Do you think the Onslow people the circulation of agricultural readelement of educated and cultivated men into the profession, have had a powerful influence in securing more attention to the aesthetics of farmexpended for more pecuniary re-

is thrown away. It may be doubted whether there is any more direct method of increasing its pecuniary value. Certainly its market value will depend very much upon its outward appearance. Tasteful and well-painted buildings, well arranged yards and gardens with neat fences, and make an amazing difference when it comes to be sold. And even if it be not sold, these things will add amazingly to the enjoyment of it by its possessor, if he be not blind

to everything but the dollar. Every man, too, owes it to the community in which he is living, to general reputation and to public enjoyment, by making all his surroundings as attractive as possiing too much attention to the outside and to show; but there is reason in all things, and a measure of time and attention and expense should be devoted by every one to make his farm and his home more and more attractive every year that

Tobacco is now grown in eightystitute the flower of the tobacco No longer than a few weeks since | belt, each raising in 1879 about 4,one of our best war ships, carrying 500,000 pounds, and this year the on board a portion of the government | crop in each one of these is estimabar room supplies, cruising off the ted at 5,000,000 to 5,250,000. The coast of Massachusetts for political whole acreage of the State in 1882 purposes, met with a sad fate, this was 64,482, and it is estimated that was a large part of our fleet of tubs, at least 70,000 acres are in cultivaand was run into, not by a monitor, tion this year. The whole tobacco but a coal barge, and destroyed, crop in 1882 amounted to 32,275.792 proving a total loss, unless the pounds. All the leading authorities now agree that the crop of 1884 will Now is there not great danger that approximate 65,000,000 pounds. But New York \$3.12, and so on down the list. This annual profit to the North Carolina farmer of more than 51 per cent. would indicate that the growing of tobacco is the most profitable agricultural work done on a large scale in America.
